ED800 / 1000 / 1500 BATTERY HIGH-TIP DUMPER

The dumpers are available in three different weight capacities 800 kg, 1000 kg and 1500 kg. There are no emissions, low noise and the drive system significantly reduces the risk of unwanted tyre marks. What's more is that the super elastic tyres eliminate the possibility of puncture, making the ED Range suitable for both indoors and out.

The largest in the range, the ED1500, is still less than 1.2 meters wide with a turning circle of just 1.6m. All 3 have been designed with tight spaces in mind. The superior battery pack will provide power for a full working day on just an 8-hour charge.

The compact size and turning circle means the ED can go where others can't.
