

TE4-80RD 3" Tsurumi Robin Diesel Water Pump

Prod Code: 8000-TSUR-D3

Tsurumi TE3-80RD 80mm Diesel Centrifugal Water Pump

The TE3-80RD is a heavy duty self-priming pump powered by a Japanese manufactured Robin DY23D-2D diesel engine. All units are equipped with carbon ceramic mechanical seals and light weight aluminium pump housings to assist with portability. For increased abrasion resistance, it has cast iron volute and impellor. These materials ensure maximum durability for the pumping of clear and black water as found on building sites. All models are housed within protective tubular steel, easy carry frame, and anti-vibration rubber feet. Hose couplings, washers, clips and strainers are supplied as standard.

SPECIFICATIONS

Engine	Robin DY23D-2D
Max output (litres/min)	900
Debris size capacity (mm)	7
Inlet/outlet diameter (mm)	80
Total head (metres)	28
Suction head (metres)	8
Pressure (bars)	2.8
Dry Weight (kg)	42
Starter	recoil
Length (mm)	590
Width (mm)	410
Height (mm)	510
