CCTV Drainage Inspection Camera

Flexiprobe P540c Pushrod Inspection Systems

Commercial video inspection

Welcome to a connected world

Flexiprobe P540c is the most powerful Pearpoint controller ever designed, providing intuitive menus and dedicated function buttons to guide you quickly through your survey.

Integrated MSCC 3, 4 or 5compliantreporting and on-board Wi-Fi allow you to share your reports via email or DropBox, all while still on site, Or simply copy to a flash memory stick in one of the three USB ports.

Colleagues and/or customers can see your video inspection in real-time by viewing it on a standard web browser on their local, connected communications device, such as a phone or tablet.

Easy to use, efficient to own

The P540c offers an intuitive graphical user interface with built-in user manual, a full-size QWERTY keyboard (regional options available) and a choice of 6 different languages at launch. Context-sensitive, ATM-style buttons on both sides of the display provide access to the easy-to-use menus, while an additional 7 buttons offer direct control of the most-used functions.

Flexiprobe P540c boasts a pixel, high definition display for sharp and crisp images and 128Gb internal memory for more than 2 months video recording in typical usage. Ruggedized, IP55 rated, case and built-in rechargeable battery provide reliability and usability in most challenging environments.

Typical usage is given as 100 minutes of videoing per day for 5 days per week.

Reporting on site

Flexiprobe P540c incorporates reporting templates to comply with multiple standards, such as MSCC3, 4 or 5 or your own. Reports are available to share as soon as you have completed your survey.

WinCan-compatibility is also an option, and this can be purchased at the same time as the Flexiprobe P540c system, or later as your needs develop.

Contact us for availability of this optional feature. May require a separate licence from WinCan

Interchangeable equipment for flexibility

Choose from 5 different lengths/flexibilities of rod and 2 cameras. Then select from a small solid sonde or 2 sizes of flexisonde which can both help guide the camera and rod round tight traps and bends, and can be located by a sonde locator such as the RD5100S.

Fast, intuitive inspection

Fast boot-up time, 10 context-sensitive buttons to the sides of the display and a further 7 additional buttons for frequently-used tasks create an inspection system that is quick to set-up and easy to use, Intuitive menus guide you through your survey without any complicated keyboard shortcuts to remember. Sharing the resulting report with customers or the office is completed in just a few key presses, allowing you to move quickly onto your next job.
